PROJECTS

[10/5/2026 - 12/6/2026]

FixItNow · Team Project

A web platform connecting customers with local service providers. The project covers the full workflow — from reporting an issue to payment. Frontend built with React and TypeScript, backend with Java Spring Boot and REST API, PostgreSQL database. Integrations include Stripe (payments), Google Gemini API (smart search) and GitHub Actions (CI/CD). The application is live and publicly accessible.

[11/5/2025 - 13/6/2025]

Sportaj.si · Team Project

Sportaj.si is a web platform for finding sports coaches, activities and athletic profiles. The project includes a user-facing side for browsing and searching sports, registration/login, profile management and communication, as well as admin and coach interfaces for managing content, activities and users. The frontend is built with HTML, CSS and JavaScript, while the backend runs on Node.js with Knex.js and a MySQL database.

[1/5/2026 - Current]

Inventory App · Personal Project

A mobile-first PWA application for managing household inventory with offline support. Features barcode/QR scanning via camera and synchronization between a local database (Dexie.js/IndexedDB) and the main database (MySQL). Frontend built with React and Vite, backend with Java Spring Boot, fully containerized with Docker.
